

# ***DVR Remote Viewer***

>Network Requirement: DVR can not go through IP sharing device, only HUB.

## **LAN (Local Area Network)**

- 1) DVR side input local IP address such as 192.168.192.5, or use the factory default IP.
  - 2) After DVR network setting, install the remote viewer to computer.  
Computer network IP also need to setup on local IP address such as 192.168.192.6.  
DVR and computer IP address cannot equal.  
-Always 0080 port.
- >PC→DVR: need a cross-link cable.

## **WAN (World Area Network)**

- 1) User apply static IP from network company, then input IP Gateway, and Subnet mask address to DVR TCP-UP setup.
- 2) Advice user apply network speed Upload 512K / Download 512K, to avoid image data too big influence the remote quality.  
The network traffic jam always make data transfer slow, it is normal.
- 3) After DVR TCP-IP setup, install the remote viewer to computer. See the remote viewer page.  
-Port is depend on network company area, but normally is 0080 port.
